VOLUNTEERS NEEDED!

Brain Imaging and Pain

The Center for Pain Research and Behavioral Health is recruiting **healthy adults between the ages of 18 and 65** for a study investigating the effect of a topical ointment on how the nervous system processes pain.

Participation involves:

- 5 laboratory visits, each lasting approximately 2 hours
- Completing questionnaires
- Pain testing
- · MRI of your brain and spinal cord
- Compensation will be provided

INTERESTED?

Call 352-273-5220 or email painimaging@phhp.ufl.edu and mention you are interested in the **Brain and Spinal Imaging Study** to learn more!
